

MOLUGU VIGNESH REDDY

vmolugu@gmu.edu | +1(571)2531321 | [LinkedIn](#)

EDUCATION

George Mason University, Fairfax, VA.

Aug 2024 – Present

Master of Science in Computer Science.

GPA – 3.89/4

Relevant Coursework – *Machine Learning, Data mining, Deep learning and neural networks, Natural language processing, Advanced Database Management, Information Security, Cloud and Devops, Information Security, Software Engineering.*

CVR College of Engineering, Mangalpalle, Telangana

Jul 2020 – May 2024

Bachelor of Technology, Computer Science

GPA – 7.79/10

Relevant Coursework – *Data Sciences, Internet of Things, Computer Architechure, Digital Logical Design, Operating System, Managerial Economics and Financial Analysis, Database Management Systems, Software Engineering, Cyber Security, Block Chain Technologies.*

SKILLS

- **Programming languages:** C, C++, JAVA, PYTHON, R.
- **Databases:** MYSQL, SQL SERVER, POSTGRESQL, MongoDB.
- **Web Technologies:** HTML5, CSS, JavaScript, bootstrap, angular, Django, react, node JS, ajax, APIs, REST.
- **Frameworks:** .NET, springboot, TensorFlow, Pytorch, Scikit-Learn, Pandas, Numpy, Docker.
- **Cloud and Automation:** AWS, Azure, GCP, Azure DevOps, Flux, Git.
- **Dashboards:** Tableau, Power BI.

PROJECTS

Health Prediction Using Data Mining

- **Designed** and developed a website utilizing machine learning algorithms to predict illnesses based on user-input symptoms, aiding early diagnosis and assisting physicians in making accurate medical predictions
- **Processed** a dataset of **4,920** patient records with **132** symptoms and **41** diseases to train a classifier system, implementing intelligent data mining techniques to enhance prediction accuracy and address health-related challenges

E-Waste Image Classification using Deep Learning.

- **Designed** and implemented a web-based application utilizing Streamlit and Keras (TensorFlow) to classify and sort electronic waste efficiently.
- Applied deep learning techniques to train the model on e-waste images, optimizing classification accuracy to support sustainable waste management practices.

Appetite Crush

- **Built** Appetite Crush(code), a MEAN stack web application utilising Angular for the front end and Node.js, Express, and MongoDB for the back end.
- **Implemented** RESTful APIs to serve a variety of recipes based on user preferences, enhancing the overall user experience.

Salary Prediction Model

- Built a predictive model using various Machine Learning algorithms in Python to forecast salaries for new hires, leveraging historical employment data.
- Processed and analyzed large datasets to train the model, ensuring accurate salary predictions, aiding HR teams in making informed hiring decisions.

CERTIFICATIONS

- AWS Certified Cloud Practitioner Certificate (*Issued - 2023*)
- Networking Essentials Certificate by Cisco (2022)
- Certificate of Merit by ISRO START (2023)

ACHIVEMENTS AND INTERESTS

- Secured First Place in the College CS Hackathon for building a health prediction model using data mining techniques
- **Interests:** Open-Source Contribution, Competitive Programming, Reading Tech Blogs, Machine Learning and AI, and exploring emerging technologies, high-performance computing, and advanced data analytics.
